$bn

Commitments¹
CAGR >43%
$m

1. Includes conditional and Investment Committee approved investments.
2. Investment deployments includes capitalised overheads.
3. Other includes 1H22 impairments and foreign currency adjustment.
Fund 1 and Funds 2&3 are fully committed; all are in harvest mode. Given the respective fund structure, the NCI have priority entitlement to distribution of capital and preferred returns, recourse only to the investments within the respective Funds. There are a substantial number of investments and associated EPV within each of those Funds from which those priority entitlements can be met.

Funds 4 and 5 are 46% committed. The investment periods complete four years from commencement, with a run-off harvest period that follows.

Funds 6 and 7 are structured on a combined investment and Fund waterfall basis except that with respect to Fund 7, funds are first allocated towards the NCI debt before allocations are made via the waterfall. Fund 7 is being restructured with the aim to have it funded by and included in the new Fund 8. The allocation of capital to Fund 7 from Fund 6 is then extinguished.

1. Returns for Funds 1 – 3 include accumulated preferred returns, special distributions and investor undrawn fee.
2. Excludes conditional investments and Investment Committee approved investments.
3. Data covers the period from 1 July 2011 for the balance sheet investments and each of the Funds from their dates of inception.
4. A successful legal outcome is one where the client wins a return through settlement or judgment; a successful financial outcome requires the Group’s income to exceed investment costs.
5. Return on invested capital (ROIC) and internal rate of return (IRR) is measured before capitalised overheads and operating overheads.
6. All data for Fund 6 is at 30 September 2021 except current investments data.

- Fund 1 and Funds 2&3 are fully committed; all are in harvest mode. Given the respective fund structure, the NCI have priority entitlement to distribution of capital and preferred returns, recourse only to the investments within the respective Funds. There are a substantial number of investments and associated EPV within each of those Funds from which those priority entitlements can be met.
- Funds 4 and 5 are 46% committed. The investment periods complete four years from commencement, with a run-off harvest period that follows.
- Funds 6 and 7 are structured on a combined investment and Fund waterfall basis except that with respect to Fund 7, funds are first allocated towards the NCI debt before allocations are made via the waterfall. Fund 7 is being restructured with the aim to have it funded by and included in the new Fund 8. The allocation of capital to Fund 7 from Fund 6 is then extinguished.
Balanced portfolio created by diversified EPV

- EPV grew to $23.2 billion\(^1\) at 31 December 2021
- Diversification mitigates risks of competition, regulatory intervention, portfolio concentration

Balanced portfolio with growth potential in all regions, particularly in the US over the short term

Global class action investments represent 29% of our portfolio (15% Australia, 14% RoW)

Direct balance sheet is in ‘run off’ as we continue our transition to a fund management model, whereby investments are funded through dedicated investment vehicles with global co-investors and joint venture structures

---

1. Includes conditional and Investment Committee approved investments.
Provisional attribution future investment completions

~$1.2bn provisionally attributable to OBL based on the realisation of our current funded investments, assuming they occur in line with past performance at 15% conversion, including management fees.

For second generation funds (plus Fund 6) the IEV attribution does not include any performance fees given it is infeasible to calculate these.

Any performance fees arising will result in a transfer of IEV attribution from NCI to OBL.

Duration risk has traditionally been addressed through a time based pricing escalator. Historically these capped out at a certain level, leaving us exposed to further delays. We have sought to address the risk by incorporating some additional IRR protection provisions. The 12 month delay sensitivity does not incorporate the effects of these duration protections and assumes the income is the IEV at whatever time it is received.

Please see the notes on slide 17 which accompany this slide and the Glossary at https://omnibridgeway.com/investors/omnibridgeway-glossary which includes key concepts.

Both the notes and the Glossary should be read in conjunction with this presentation.
The investment process

1H FY22

1. Origination
- Opportunities arise from potential clients, advisors, other third parties or in-house idea-generation
- Confidentiality agreement executed
- Claim outlined by client and their legal representative

2. Application review
- Assessment of type and strength of case, financial analysis, legal fee arrangement, likely length of time to resolution, estimated investment capital required to completion, defendants' ability to satisfy a judgment/award

3. Funding decision
- Relevant Investment Committee (IC) receives due diligence report prepared by Investment Manager (IM)
- IC decides whether to recommend to the applicable Fund

4. Monitoring and realisation
- Investment may take 1 - 5 years to complete. Completed investments' average duration 2.9 years
- IM monitors developments in investment as it progresses and receives periodic updates from lawyers
- IC consulted where prospects of investment materially change and re-evaluation required
- In certain jurisdictions such as Australia, we may provide strategic guidance concerning the investment and settlement opportunities
- Alignment of interest with clients to maximise value of investments means insight into settlement process

5. Distribution of proceeds
- If investment successful, defendant pays agreed amount to claimant's lawyers trust account
- Lawyer deducts fees owing to Group and pays balance of funds to client
- If claim fails, Group may be responsible for paying defendant's costs on terms agreed with client (if not covered by After The Event or Adverse Cost insurance)
Track record of success

Internal rate of return (IRR)¹

Return on invested capital (ROIC)¹, ², ³, ⁴

1. Measured before capitalised overheads and operating overheads.
2. Calculated on a rolling basis for IMF since 1 July 2011 and for OBE since the merger.
3. Calculated on a rolling basis for IMF since inception and for OBE since the merger.
4. This data has been reviewed by BDO to 31 December 2021.
Typical merits and enforcement funding comparison

Merits funding

**DEFINITION**
- Litigate/arbitrate claim or portfolio of claims against right to agreed share of proceeds of claim or portfolio
- Typical funded costs: Lawyer fees, court fees, expert fees, adverse costs
- Funder ‘Arms length’ after due diligence and approval
- If successful, final judgment/award typically paid in full by defendant(s)
- If claim unsuccessful, no fee owed by funded party

**TYPICAL CLAIMS**
- Breach of contract
- Investment treaty arbitration
- Group/collective redress
- Anti-trust
- Securities
- Intellectual Property

**RISKS**
- Relevant Investment Committee (IC) receives due diligence report prepared by Investment Manager (IM)
- IC decides whether to recommend to the applicable Fund

Enforcement funding

**DEFINITION**
- Enforce, recover and collect on a judgment/award/low risk claim, or portfolio, against right to agreed share of enforcement proceeds
- Typical funded costs: Asset tracing & research fees, lawyer fees, expert fees, monetisations, adverse costs
- Funder Operational involvement (strategic, legal & asset tracing) and higher internal costs
- Often purchase/monetise as part of investment structuring
- If successful, returns from monies recovered/collected
- If no money recovered/collected, no fee owed by funded party

**TYPICAL CLAIMS**
- Able but unwilling debtors, using asset dissipation or legal strategies
- Court judgments
- Arbitration awards
- Non-performing loans
- Letters of credit / promissory notes
- Personal, corporate or sovereign guarantees

**RISKS**
- Insolvent award/judgment creditor
- Enforcement takes longer than anticipated due to more/slower jurisdictions and/or appeals
- Enforcement requires more investment due to longer proceedings, more/expensive jurisdictions and/or appeals
- Inter-creditor disputes (dilution risk)
Regulatory landscape

- Ongoing regulatory reform in Australia, Europe and US
- Ongoing advocacy for appropriate industry regulation

Australia
- OBL supports some measures announced to date: requirement for litigation funders to hold ASFL; class actions registration under managed investment scheme regime.
- Reduced number of funders able to operate

Europe
- Committee on Legal Affairs report of 17 June 2021 by EU Parliament member Axel Voss (Voss Report)
- Ongoing process with responses provided to Committee
- Voss Report relied heavily on misinformation in the (now deferred) Australian process

US
- No material changes anticipated

- EU Parliament member Axel Voss (Voss Report)
Creating value through our diversified model

Strategic focus on growth in US market, with a target to double commitments

</tbody>
</table>

1. Represents aspirational objectives of how we aim to achieve our overall strategic priorities. They are not a forecast.

FY25 target:
- $5bn FUM
- $1bn annual commitments

Key short-term drivers of our business are:
- Investment completions
- Growth in commitments

Relevant long term metrics are:
- Achievement of 5-year business plan targets
- Growth of resources to support our business and enhance our capability
- Expansion of products and diversification of risk
Annexure
Provisional attribution future investment completions
Assumptions and notes in respect of slide 10

The attribution of IEV between OBL equity and non controlling interests (NCI) has been prepared on the basis of the following assumptions:

• All unconditionally funded investments in the portfolio at 31 December 2021 (Portfolio Investment(s)) complete in the selected Possible Completion Period (PCP)
• All Portfolio Investments are completed for the full estimated portfolio value (EPV)
• The income received by the Omni Bridgeway funding entity upon the completion of a Portfolio Investment reflects the LTCR (which includes losses) and hence equalled the full IEV of an investment
• The residual capital to be deployed in Funds 2&3 is deployed in equal portions during the remainder of FY22 and FY23
• Performance fees in Funds 4, 5 and 6 have been excluded from the attribution and hence any performance fees earned will see an IEV attribution shift from NCI to OBL equity
• For Funds 4 and 5 the attribution is split solely in proportion to capital invested
• For Fund 6 the attribution to OBL equity reflects the historic blended average proportion of proceeds received by OBL equity (excluding performance fees)
• FX rates are assumed to remain constant across the periods

The sensitivity analysis provided uses the following assumptions:

• IEV is adjusted to reflect variations in the conversion rate of EPV to income from the LTCR of 15% with the selected sensitivity rates of 10% and 20%
• EPV of impaired assets excluded from EPV with commensurate flow-on to IEV and attribution
• PCP on all Portfolio Investments is delayed by 12 months

Management fee assumptions:

• The estimated management fees are based upon aggregated anticipated budgeted investment deployment for Funds 4, 5 and 6

Notes
Possible completion period (PCP):

• PCP is a dynamic concept and is subject to regular review and updating to take account of the circumstances of the underlying investment
• It is to be expected that the PCP for some investments within the portfolio will be adjusted at each reporting date
• PCP is not necessarily the same as anticipated IFRS income recognition period governing income recognition rules

Estimated portfolio value (EPV) assumptions:

• EPV includes all Portfolio Investments, which includes, irrespective of impairment, investments which have had a negative award or judgment but nonetheless the Group believes have positive prospect s of success on appeal
• At 31 December such investments included Wivenhoe ($253m in FY23), Westgem ($250m in FY23), and a Fund 4 investment in FY24
• Also included at 31 December was Novo Nordisk ($702m in FY23) which subsequently settled and was impaired to reflect no recovery of the deployed capital
• Conditionally funded and IC approved investments are not included in the EPV
