1. This is the Company's current best estimate of the claims recoverable amount (or remaining recoverable amount if there has been a partial recovery). It considers, where appropriate, the perceived capacity of the defendant to pay the amount claimed. It is not necessarily the same as the amount being claimed by the Company's client/s in the matter. It is also not the estimated return to the Company from the matter if it is successful. No estimated claim value has been included for any contingently funded matters until all conditions are fulfilled.
2. The possible completion period is the Company's current best estimate of the period in which the case may be finalised. The case may finalise earlier or later than in this period. Completion means finalisation of the litigation by either settlement or judgment for or against the funded client. It may not follow that the financial result will be accounted for in the year of finalisation. Completion estimates are prepared and announced on a quarterly basis.
3. Cases which have settled subject to a condition or to Court approval remain in the portfolio at their original value until the condition is fulfilled or approval is given.

POSSIBLE COMPLETIONS IN FY2016

Below is a list of matters that may complete in FY2016. Other matters may also complete in that period.

This application is likely to be heard within the next three months. ▪ The litigation against all other banks is stayed awaiting the outcome of the claims against the ANZ Bank.
USA Cases 003,008, 014, 017,021	A number of US funded cases could complete in FY2016. The total value of US cases expected to complete is \$178.5M.
Westgem	The Court has ordered a mediation between the parties in December 2015.
S&P Lehman	The trial in this matter is scheduled to commence on 12 October 2015.

Barriers to entry	<ul style="list-style-type: none"> Size of costs and duration of large litigation matters, as well as potential for adverse costs (in Australia and the UK), preclude many plaintiffs from funding their own actions. Litigation funding requires specialist skill set.
Australian market well established	<ul style="list-style-type: none"> Fourth or fifth largest common law litigation market in the world. IMF is the clear market leader in its home market.

WHAT IS LITIGATION FUNDING?

- As a “litigation funder” IMF provides funding on a contingency basis to businesses and individuals with claims for loss and damage.
- IMF provides funding for the client’s case or to the client and, in jurisdictions where adverse costs are relevant, agrees to pay any costs (incurred during the term of the funding agreement) awarded to the other side should the client’s case be unsuccessful.
- In return, IMF generally receives a right to be reimbursed all that it has paid out and receives an assignment of a share of the amount awarded to the client by way of judgment or paid to the client by way of settlement. IMF’s return in the US is more typically a multiple of the amount invested.
- As a litigation funder IMF does not provide legal advice and is not paid “on an hourly rate”.

THE IMF LITIGATION FUNDING PROCESS

1. OUTLINE OF CLAIM

The investing process generally begins with the execution of a confidentiality agreement. The claim is then outlined by the client or their legal representative.

2. APPLICATION REVIEW

IMF evaluates opportunities by assessing a number of factors, including the type and strength of the case, the potential damages and/or settlement prospects, legal fee arrangement, the likely length of time to resolution, the amount of capital required to prosecute the case, and the defendant's ability to satisfy a judgment.

3. OFFER OF FUNDING

The IMF Investment Committee receives a due diligence report which is prepared by an IMF Investment Manager. The Investment Committee decides whether or not IMF will make the investment. If approved, a Litigation Funding Agreement will be executed by the parties.

4. CASE PROGRESSES

A case may take between 1 and 5 years to complete. IMF's average is 2.4 years. IMF will monitor the developments in the case as it progresses to trial. IMF receives periodic updates from the lawyers. In certain jurisdictions (such as Australia) IMF will also provide strategic advice concerning the litigation.

5. SETTLEMENT OR TRIAL

The majority of cases settle before trial. Cases often settle at mediation, at which a mediator agreeable to both parties tries to assist the parties to reach a settlement. IMF is involved in this process – after all, we have a mutual interest in seeing our clients maximise the value of their claims.

6. DISTRIBUTION OF PROCEEDS

If the claim is successful, the defendant will pay an agreed sum of money into the plaintiff lawyer's trust account. The lawyer will deduct the fees owing to IMF pursuant to the Funding Agreement, and pay the balance of funds to the client. If the claim fails, IMF is responsible for paying the Defendant's costs on the terms of the Funding Agreement.

- * A 5.0 cent dividend was announced on 19 August 2015
- Record Date: 25 September 2015
 - Payment Date: 9 October 2015

Dividend Policy

- The Directors have determined they will consider, and where appropriate implement, a regular semi-annual dividend which reflects the cash position of the Company at the time of the dividend and the likely demand for cash over the ensuing twelve month period.

Dividend Reinvestment Plan

- The Company has put in place a Dividend Reinvestment Plan and, on appropriate occasions, will arrange underwriting to reduce the impact a particular dividend might otherwise have on cash.
- Shareholders are able to participate in the Dividend Reinvestment Plan in relation to the dividend announced on 19 August 2015.

LITIGATION FUNDING MARKET

- There is currently no direct empirical data available on the size of the litigation funding market in any market IMF operates in.
- The following estimates have been calculated by reference to third party research reports, court statistics or competitor opinion on litigation market size and estimating the fundable portion based on litigation areas in which IMF operates.

Description	Australia	US	UK
Estimated litigation market (A\$ billion)	21.1	200-300	59
Estimated funding market (A\$ billion)	3	3 - 5	<1
Anticipated compounded annual growth rate	3%	Limited	Limited

- Litigation spending is arguably correlated to the economic cycle, and is expected to be soft in the next several years. However, litigation funding is arguably counter-cyclical and demand may exceed growth in demand for litigation spending.
- However, as penetration rates for litigation funding are low in all jurisdictions there is an opportunity to exceed growth rates, particularly in the US where penetration rates are proportionately lower.

IMF'S COMPETITORS

In Australia it is estimated that IMF has 69% of the litigation funding market. (ref : IBIS 2014)

- The key industry participants in the markets in which IMF operates include:

Australia	US	Europe
JKL/Longford Capital	Burford	Harbour
Litigation Lending Services	GKC	Vannin Capital Limited
LCM Litigation Fund	Parabellum	Calunius
Harbour	Longford Capital	Therium Capital
Claims Funding Australia	Juridica Investments Limited	Burford
Vannin Capital Limited		

- There are other specialised participants with various levels of participation in the industry. Some funders are focussed on niches within the litigation funding industry, such as disbursement funding or funding for family law matters. These funders rarely compete directly with IMF.
- There are also opportunistic funders who deploy funds from family investments or specialised closed ended funds. These funders on occasion compete against IMF, more so in the insolvency market than others, but have also been visible in the class action area.

KEY RISKS

Item	Description
Choosing, and remaining in, a funded case that is ultimately lost	<ul style="list-style-type: none"> If a funded case is lost, IMF will lose not only its investment but may also have to pay the defendant's costs.
Reliance on key management	<ul style="list-style-type: none"> IMF depends substantially on its executive directors, senior management and key personnel to oversee the day-to-day operations and the strategic management of IMF. There can be no assurance given that there will be no detrimental impact on IMF if one or more of these directors or employees cease their employment.
Government regulation	<ul style="list-style-type: none"> No assurance can be given that regulation in Australia and overseas will not change in the future and adversely affect IMF's business and financial performance. However, there is presently no such legislation proposed in the markets in which IMF operates of which it is aware.
Judicial decisions	<ul style="list-style-type: none"> To date, the courts have generally found in favour of litigation funding arrangements in Australia but the courts, in Australia or overseas, will continue to oversee the development of the litigation funding industry and adverse decisions may impact on the business of IMF.
Multiple defendants	<ul style="list-style-type: none"> In some cases defendants may add third parties to the funded litigation or more defendants may be joined, potentially increasing adverse costs if the litigation is unsuccessful (in certain markets).
Technology	<ul style="list-style-type: none"> IMF is dependent on technological systems for its Case Management System. These systems may fail or may not operate properly. IMF may fail to keep its technology up to date with the resultant loss of business opportunities.
Competition	<ul style="list-style-type: none"> IMF currently has a handful of competitors in the Australian litigation funding market, including overseas based competitors, who are becoming more active. There are also two other litigation funders vying for a multinational litigation funding business. As time passes and litigation funding becomes more widespread, competition will develop, and such competition may impact on the performance of IMF.
